ITERS-3
Indoor and Outdoor Gross Motor
Materials and Interactions

Weather Permitting means that there is no public health warning due to temperatures that are too high or too low, or active precipitation such as rain or snow. However, **scheduled outdoor times should be modified so children can go out if weather allows**. **For example, it might be raining in the early morning, but clear up later during the observation. In this case, children should have some opportunity for outdoor play.** If the weather permits outdoor play, but unavoidable health hazards are present outdoors, such as high levels of pollution or uncontrollable mosquitoes, outdoor play is not required (**(Refer to Bright From the Start Weather Chart and ITERS-3 pg. 13).**

If weather does not permit outdoor play, vigorous indoor play should be substituted for the required amount of time in a suitable area (Minimum 30 minutes).

Ages	Outdoor (30 Minutes) Weather Permitting	Indoor (30 Minutes) Weather Not Permitting
Non-Mobile	**<u>Infants</u>** • Outdoor pad or blanket, • Crib gym for younger infants • Push toys • Grasping toys to reach for or shake • Balls • Ramps for crawling	*Examples for Indoor Play For Non-Mobile Children:* • Non-Mobile Children should have space to move arms and legs freely and roll over. • Non-Mobile Children should be separated from Mobile Children. • Tummy Time • Crib Gym • Grasping Toys to reach or shake • Balls • Ramps for Crawling
Mobile	**<u>Toddlers & Twos</u>** Riding toys without pedals Small riding toys with pedals Large push-pull wheeled toys Balls and Beanbags Age-Appropriate Climbing Equipment	*Examples of Indoor Play For Mobile Children:* • Dancing to Music • Exercising • Running • Hopping • Climbing • Riding Wheel Toys and other activities that increase children's movement beyond that usually seen in classroom.

ITERS-3 Gross Motor Supervision of Play

1. Show awareness of the whole group even while working with 1 child or a small group.
2. Supervision is individualized (ex: closer supervision of child with greater needs; infant moved to avoid boredom).
3. Play with children and show interest in or appreciation of what they do (Work the Play Area Like A Clock).
4. Anticipate potential problems before they occur (Ex: bring out duplicate toys; keep quiet play from active play.
5. React quickly to solve problems in a comforting and supportive way (do not call across room or playground).
6. Give encouragement when needed (involve wandering child in play, help baby with access to toys).
7. Vary type of supervision to meet differing requirements of activities (Ex: close supervision beside climbing/sliding /swinging structures and when working with smaller pieces of equipment).

ECERS-3
Indoor and Outdoor Gross Motor
Materials and Interactions

Weather Permitting means *almost every day*, unless there is active precipitation, public warnings of extremely hot or cold conditions, or public announcements that advise people to remain indoors due to due to high levels of pollution that might cause health problems **(Refer to Bright From the Start Weather Chart and ECERS pg. 12).**

Children should be dressed properly and taken outdoors on most days. This might require that the schedule be changed to allow children outdoor play in the early morning if it will be very hot later in the day. Or it might require that the program ensure that the children have boots and change of clothes for a day when the grass is wet.

After bad weather, staff should check the outdoor area, dry off equipment, sweep away water, or block off puddles as needed, before children go out. Programs with protected outdoor areas such as a deck or patio, are more likely to be able to meet the requirements for allowing outdoor activity daily, weather permitting.

Only when weather does not permit use of the outdoor space, can an indoor space be substituted. (Minimum 30 minutes). ***See notes for clarification pg. 24 (3.1, 3.2, 5.3)***

Ages	Outdoor (30 Minutes) Weather Permitting	Indoor (30 Minutes) Weather Not Permitting
Skills	• Equipment needs to stimulate 7 skills areas including: Climbing, Sliding, Throwing, Catching, Kicking, Balance (Beam only), Cycling, Jumping, Baseballs and Bats. • Skills only counted if stimulated by equipment (Hopping, skipping and running do not count). • Need Enough materials for all children to participate in skills during gross motor play.	• Examples of Activities for indoor gross motor play ***(limited space available or too many hazards for active play).*** *1.) Vigorous dancing/exercising to music.* *2.) Directional CD's for physical activity (Hokey Pokey, Simon Says, etc…)*
Equipment	**Need combination of portable and non-portable equipment. Examples:** • Slides and Climbing Equipment (You have this). • Need 3-5 Balls that stimulate Kicking, Throwing, Catching. (Will count as two skills) (Counts as third skill if basketball hoop or bat available). • Jump Ropes and other games that encourage jumping. • Toys that encourage pedaling (Cycle toys) including safety helmets. • Hula Hoops • Baseballs and Bats (Need at the seven level).	*Portable Equipment to* ***use in room with large, open space such as an empty room or gym (no major hazards).*** *1.) Free-running, hula- hoops, basketball hoops, jump ropes or use of wheeled toys (only if unobstructed space available such as in a large, empty room or gym).* *2.) Large motor games such as "Simon Says".* *3.) Parachute*

ITERS-3 Gross Motor Supervision of Play

1. Refer to Bright from the Start Weather Chart and current weather warnings to determine if weather permits indoor or outdoor for today.

2. Check playground and clean-off equipment prior to play (clear off rain/dew, dirt etc.)

3. Provide a variety of portable and non-portable equipment that activities that will stimulate 7 skills areas including: Climbing, Sliding, Throwing, Catching, Kicking, Balance (Beam only), Cycling, Jumping, Baseballs and Bats.

4. Vary type of supervision to meet differing requirements of activities (Ex: close supervision beside climbing/sliding /swinging structures and when working with smaller pieces of equipment).

5. Show awareness of the whole group even while working with 1 child or a small group.

6. Supervision is individualized (ex: closer supervision of child with greater needs or disabilities).

7. Play with children and show interest in or appreciation of what they do (Work the Play Area Like A Clock).

8. Anticipate potential problems before they occur (Ex: bring out duplicate toys; keep quiet play from active play, facilitate children taking turns with equipment).

9. React quickly to solve problems in a comforting and supportive way (do not call across room or playground).

10. Give encouragement when needed (involve wandering child in play, help baby with access to toys).
